

Spyros Diplas is a Research Manager at SINTEF and Head of the Research Group Material Physics-Oslo. His main specialisation is Physical Metallurgy and Materials Science and is a graduate of the National Technical University of Athens (M. Eng.), University of Manchester, UK (MSc) and University of Surrey, UK (PhD). He has more than 30 years' experience with processing, characterisation, and testing of metallic and ceramic materials for structural applications and

sustainable energy solutions. His research interests lie within metal physics, bulk and surface materials characterisation, environmental behaviour of materials, alloy development, casting & solidification of ferrous and non-ferrous alloys, powder and particle technology, additive manufacturing, coatings and thin films, minerals, and energy related materials. He is a member of Operational Management Board of the European Materials Characterisation Council, the Editorial Board of the European Journal of Materials and has held an academic position as an Associate Professor at the Centre for Materials Science and Nanotechnology/Department of Chemistry of the University of Oslo for the period 2008-2023. Diplas has participated in various EU and Norwegian research and innovation projects as well as in industrial research, has co-authored > 110 peer reviewed publications in international journals and held > 100 presentations in international conferences.
