

Angeliki G. Lekatou, currently a Full Professor at the Department of Materials Science and Engineering, University of Ioannina, Greece, holds a Diploma in Mining and Metallurgical Engineering from the National Technical University of Athens and a PhD in Chemical Metallurgy from the University of Wales-Swansea. Her Post-Doctoral research was carried out at the University of Manchester (UMIST)-Corrosion & Protection Centre and Salford University-Research Institute for Design, Manufacture and Marketing, in the fields of marine corrosion and corrosion in the nuclear industry. She has industrial experience as Head of the Research Laboratories, Bentonite Division, S&B Industrial Minerals SA. and Research/Service Engineer, MIRTEC S.A./Metallurgical Industry Research and Technology Co. She has participated in more than 30 competitive projects, whereas she is the author of 5 books on physical metallurgy and corrosion issues, ~80 articles in peer reviewed journals and more than 120 articles in conference proceedings. Her research interests mainly include electrochemical corrosion and wear of advanced materials, particulate composites, thermal spray coatings and metastable alloys.
