

Mario Guagliano is a Full Professor in the Department of Mechanical Engineering at Politecnico di Milano, Italy. With more than 30 years of research experience, he specializes in surface treatments and processes that enhance the mechanical performance of materials and structural components, as well as the development of functional surfaces. His current research focuses on cold spray technologies for coating, repair, and additive manufacturing, and on impact-based treatments for additive manufacturing post-processing and surface functionalization. He has coordinated European Union-funded research projects, led national collaborative projects, and collaborated extensively with industry and public organizations. He has served as chairman and delivered plenary lectures at numerous international

conferences. Professor Guagliano is listed among Stanford University's top 2% most-cited scientists worldwide and has authored or co-authored more than 200 papers in international journals. In 2018, he was awarded an honorary doctorate by the University of Žilina (Slovakia).
